

DAILY DAD INSTRUCTION CHECKLIST (KEEP SEPARATE)

- **Module 1:** Ensure the primary MicroSD card is pre-flashed with standard **Raspberry Pi OS (64-bit) with Desktop**.
- **Module 2:** Ensure your network printer is powered on and connected to your home router. Note its model number or network IP address.
- **Module 3:** Have your family Bitwarden master vault credentials and his managed Google account login info ready.
- **Module 4:** No setup required.
- **Module 5:** If Minecraft Pi Edition isn't pre-installed on the latest OS build, verify that the 64-bit ARM compatibility layer or flatpak wrapper is working.
- **Module 6:** No setup required.
- **Module 7 Verification:** Verify that the repository **ByScreams/Gorillas-Python** is still active on GitHub or note a reliable backup fork of the classic python game if needed.
- **Module 8 Verification:** Verify that the repository **the-gorgon/python-roguelike** is accessible. If you prefer a different command-line dungeon crawler, simply swap the search terms in the briefing text.
- **Module 9 & 10:** Provide a secondary blank MicroSD card and a USB-to-SD card reader accessory tool.
